

WARFA invites you to an afternoon
with Alexander Noack
ANC / ELSBETT conversion technology
Discussing
Vegetable Oil Conversion of Modern Diesels
(Including Common Rail Diesels)

Alexander Noack

- For more than 20 years has focused exclusively on developing high-tech engine conversion systems for the safe and effective use of vegetable oil based fuels, originally with Elsbett, the early developers of what is now the Golf diesel engine.
- His systems have been fitted in **thousands of engines around the world**. ANC use cutting edge professional 3D software in the development process, and only work with trusted and proven manufacturers to assure only the highest quality.
- ANC are totally committed to maintaining the **highest quality standards**, which assures our continued leadership in the industry.
- Alexander is constantly working on developing systems for the most modern diesel engine applications.
- Continues to supply parts for Elsbett WVO conversion systems.

Presenters:

- Principles of using Used Cooking oil for use Fuel – Tim Law
- Obtaining Used Cooking oil for use as Diesel Fuel – Sharon Armstrong
- Preparing Used Cooking Oil for use as Diesel Fuel – Tony Clark
- Leading edge technology applications – Alexander Noack

When: 2:00pm Sunday 8th June
Where: 16 Guthrie Street Osborne Park WA
Cost: \$5.00 per person includes afternoon tea

To book a place, contact:
